

WORKPLACE PREVENTION PROGRAM

REMINDER MESSAGES

Reminder (Inspiring Stories)

It's been [.....] weeks since we launched The Jodi Lee Foundation's Workplace Prevention Program. For those of you who haven't already done so, please complete the screening test, it might be the best decision you've ever made.

Every two hours, bowel cancer claims a life. That's around 80 people every week or more than 4,000 people each year.

Please take a minute to look at the Foundations' [Inspiring Stories](#) page. It will make you realise how important screening is.

For more information about bowel cancer go to: <http://www.jodileefoundation.org.au>.

Reminder (Screening Saves Lives)

As part of our commitment to preventing bowel cancer, we have implemented The Jodi Lee Foundation's Workplace Prevention Program.

As you now know, bowel cancer is Australia's second biggest cancer killer, but up to 90% of cases can be successfully treated or even prevented if detected early, which is why screening is so important.

Please take a few minutes to watch this short video about the impact screening had on the lives of two people, and their friends and family: [Screening Saves Lives](#).

Reminder (once you have your participation report)

More than 17,000 Australians will be diagnosed with bowel cancer this year alone, but the good news is it can be prevented if you are proactive about your health and screen regularly.

Remember, bowel cancer can often be present for many years before showing any symptoms, which is why screening is essential.

[.....] of you took screening tests and so far only [.....] have completed them, however it's not too late.

For those of you who took a test home, please use it today. It might just save your life.

For more information about bowel cancer go to: <http://www.jodileefoundation.org.au>.
